

TRAFFIC MANAGEMENT POLICY

Our commitment

AMH Civil and leadership is committed to ensuring the safety of all road users, workers, and pedestrians through the implementation of compliant and effective Temporary Traffic Management Practices. We are dedicated to adhering to the highest industry standards as set out in AustRoads Guide to Temporary Traffic Management (AGTTM), and the relevant Victorian regulations, codes of practice and authority guidelines.

Our goal is to minimise disruption and contribute to the efficient operation of the road network. We will achieve this through training, employment of qualified personnel at all levels in the business for traffic planning and execution on site, and engaging with appropriately qualified Traffic Subcontractors and Consultants to foster a culture of continuous improvement in planning and executing temporary traffic management.

Traffic Management in practice

- Operate in accordance with our values, policies, minimum requirements and procedures and provide the framework for setting, reviewing and improving traffic management planning and outcomes during works.
- Compliance with the AustRoads Guide to Temporary Traffic Management, applicable laws, regulations, codes of practice and standards that may impact traffic management in the workplace. This will include periodic review of external obligations and update of business systems as required for compliance currency.
- Engage and consult with qualified and recognised authorities, consultants, and subcontractors for planning, approval and implementation of Temporary Traffic Management as appropriate.
- Ensure appropriate staff and workforce Traffic Management training to ensure the safety, adequacy and compliance of traffic management planning and establishment on site.
- Provide Traffic Management resources as and when required with sufficient experience as required to identify traffic management needs and for the planned activity.
- Consult with our employees and sub-contractors on matters relating to workplace health, safety and welfare.
- Ensure appropriate traffic management information is disseminated to employees, sub-contractors and visitors in the workplace.
- Ensure prevention of workplace related traffic management incidents and disruptions.
- Apply an integrated risk management system which ultimately seeks to eliminate and control traffic management hazards through the business lifecycle.
- Establish standards of performance, measurable objectives and targets to track our success.
- Ensure all incidents are reported and fully investigated to identify all causal factors.
- Undertake regular audits and inspections of our workplaces to improve, maintain and verify compliance.
- Empower employees and sub-contractors to cease work where there is a threat to the safety of themselves or others.
